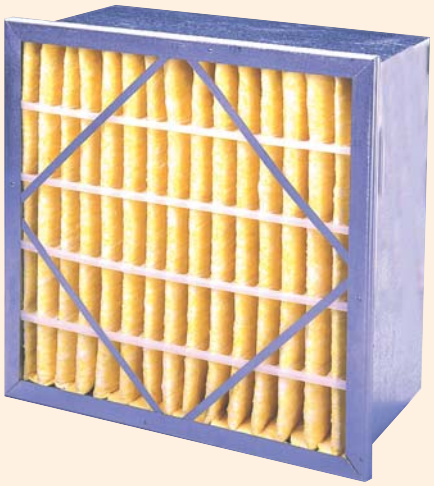
FLANDERS PRECISIONAIRE®

Rigid Air

Extended media surface rigid air filter

Rigid filter with extended media surface area

- Rugged corrosion-resistant steel casing minimizes damage during shipping and handling.
- Synthetic media is held in position by upstream and downstream plastic or metal pleat supports.
- Units are available with or without header.
- Filters are completely rigid.



Physical Data

Frame is 24 ga. corrosion-resistant steel with a double-turned flange for extra strength. The filtering medium is micro-fine synthetic Media is backed by expanded an expanded metal grid and pleat separators on the face hold pleats in position.Diagonal metal supports prevent racking. Header: 13/16” wide 26 ga. corrosion-resistant steel Actual Header or Box Filter Face Size: Nominal size less 5/8” (e.g., a nominal 24” x 24” filter is actually 23 3/8” x 23 3/8”)
